For retail customers, there are dealer locators present on the [powersportrider.com](http://powersportrider.com) and [bikerschoice.com](http://bikerschoice.com)

Using the Speedway Motorsports Shelter is easy as 1, 2, 3

## About the Product

After your ride, you pull into your driveway and into your bike's own, personal shelter. The retractable waterproof cover is easy to use, keeps out weather, dust and debris, with the added feature of cross-ventilation to prevent any condensation from occurring inside.

Included is an LED Bright Light which mounts to hardware inside the shelter, for easy night access; and with the addition of a Diamond-Tough floor (available separately), worries about oil drips, condensation and dust on the driveway are over. Now your bike can be parked in the garage, along side the house, or in the driveway, fully covered and completely safe with the security of a padlock.

### Features and Benefits:

- Built-in locking hardware for added security (lock not included)
- Retractable structure makes access simple and quick -- no waiting for pipes to cool
- Two Sizes Fits All: **Standard/Sport** and a **Touring Shelter** for full-dress touring bikes
- Diamond Tough Floor (available) to prevent driveway drips and to keep out dust and moisture
- Cross Ventilation with large window on each side of the shelter
- Waterproof seams keep weather and condensation out
- LED Bright Light (included) for night access
- Carrying Case with Handles for portability
- Wheel Chock available for perfect bike placement and stabilization
